

## **Maciej Szubra**

Maciej Szubra has got a university education. He graduated from the Faculty of Geo-Data Science, Geodesy and Environmental Engineering at AGH University of Science and Technology with a degree in Geodesy and Cartography. In addition, he has an MBA from Cracow School of Business at Cracow University of Economics (CSB CUE).

In 2017-2019, he worked as a consultant for Aecom Polska sp. z o. o. in connection with the Odra and Vistula River Basin Flood Project. He was a member of real estate and design teams and conducted social and economic research involving people affected by the project. He was also involved in the execution of the Real Estate Acquisition and Relocation Projects, technical concepts and the analyses of project economic efficiency.

At the same time, he cooperated with International Management Services sp. z o. o. As part of this cooperation, he prepared feasibility studies as well as technical concepts of spatial analyses and cartographic documents, and analysed strategic documents of state and self-government units.

He has been employed with UBS Business Solutions Poland sp. z o. o. since 2019 as Data Analyst where he has analysed competition among companies representing banking, power, sales, construction, real estate and transport sectors. The said analyses have been carried out based on demographic, spatial and financial data. In addition, he creates demographic models, regional exhibition models and competition models.

Mr. Szubra has technical and consultancy skills as well as experience in international business. He has a perfect command of English.
